## **Explorations in Topology: Map Coloring, Surfaces and Knots** David Gay

This book gives students a rich experience with low-dimensional topology, enhances their geometrical and topological intuition, empowers them with new approaches to solving problems, and provides them with experiences that would help them make sense of a future, more formal topology course. The innovative story-line style of the text models the problems-solving process, presents the development of concepts in a natural way, and through its informality seduces the reader into engagement with the material. The end-of-chapter Investigations give the reader opportunities to work on a variety of open-ended, non-routine problems, and, through a modified “Moore method”, to make conjectures from which theorems emerge. The students themselves emerge from these experiences owning concepts and results. The end-of-chapter Notes provide historical background to the chapter’s ideas, introduce standard terminology, and make connections with mainstream mathematics. The final chapter of projects provides opportunities for continued involvement in “research” beyond the topics of the book.

- \* Students begin to solve substantial problems right from the start
- \* Ideas unfold through the context of a storyline, and students become actively involved
- \* The text models the problem-solving process, presents the development of concepts in a natural way, and helps the reader engage with the material

### **From reader reviews:**

#### **Vivian Obrien:**

The reason why? Because this Explorations in Topology: Map Coloring, Surfaces and Knots is an unordinary book that the inside of the e-book waiting for you to snap this but latter it will distress you with the secret the idea inside. Reading this book close to it was fantastic author who also write the book in such awesome way makes the content interior easier to understand, entertaining approach but still convey the meaning completely. So , it is good for you for not hesitating having this any longer or you going to regret it. This book will give you a lot of benefits than the other book possess such as help improving your skill and your critical thinking means. So , still want to hold off having that book? If I have been you I will go to the e-book store hurriedly.

#### **Kelly Blow:**

This Explorations in Topology: Map Coloring, Surfaces and Knots is brand new way for you who has interest to look for some information given it relief your hunger of knowledge. Getting deeper you into it getting knowledge more you know or perhaps you who still having small amount of digest in reading this Explorations in Topology: Map Coloring, Surfaces and Knots can be the light food for yourself because the information inside that book is easy to get simply by anyone. These books produce itself in the form that is reachable by anyone, that's why I mean in the e-book application form. People who think that in guide form make them feel drowsy even dizzy this guide is the answer. So you cannot find any in reading a reserve especially this one. You can find actually looking for. It should be here for a person. So , don't miss that! Just read this e-book type for your better life and knowledge.

#### **Catherine Stoltenberg:**

Do you like reading a book? Confuse to looking for your best book? Or your book had been rare? Why so many problem for the book? But virtually any people feel that they enjoy intended for reading. Some people likes looking at, not only science book but novel and Explorations in Topology: Map Coloring, Surfaces and Knots or even others sources were given understanding for you. After you know how the good a book, you feel need to read more and more. Science reserve was created for teacher or maybe students especially. Those books are helping them to increase their knowledge. In various other case, beside science guide, any other book likes Explorations in Topology: Map Coloring, Surfaces and Knots to make your spare time a lot more colorful. Many types of book like this.

#### **Michael Vogel:**

A lot of reserve has printed but it is unique. You can get it by net on social media. You can choose the most effective book for you, science, comedian, novel, or whatever by searching from it. It is named of book Explorations in Topology: Map Coloring, Surfaces and Knots. You can contribute your knowledge by it. Without causing the printed book, it can add your knowledge and make you actually happier to read. It is

most critical that, you must aware about reserve. It can bring you from one place to other place.
