## **Therapy Outcome Measures for Rehabilitation Professionals: Speech and Language Therapy, Physiotherapy, Occupational Therapy** Pamela Enderby, Alexandra John, Brian Petheram

Previously published as two separate books for Speech and Language Therapists and for Physiotherapists, Occupational Therapists and Rehabilitation Nursing, this book has now been updated and expanded and combines the two first editions into one. This fits in with the increased amount of team working in rehabilitation, both in hospital and community settings. The book assists with the practical implementation of gathering outcome data on patient/clients receiving treatment. Over the last decade there has been a growing awareness of the importance of being able to gather information that could assist in identifying specific gains related to treatment programmes. This should not only help to identify areas for resource change, but also enable health care professionals to monitor the effectiveness of their treatments with individual clients.
