Sustainable Buildings in Practice: What the Users Think George Baird

Current assessment methods of sustainable buildings do not adequately account for the users' needs. Given that over the life of a building, total salary costs far outweigh both operating costs and combined capital and rental costs, the occupants' needs are not something which should be sensibly ignored.

This book presents an unbiased evaluation of thirty of the most cutting-edge, sustainable buildings in the world, in terms of the users' perceived comfort, health and productivity. The author has visited the buildings, interviewed the design teams and examined the findings of a sixty-question standardized user questionnaire. The book provides:

- thirty case studies covering mixed-mode, passive and environmentally sustainable commercial and institutional buildings
- detailed insights into the principles underlying the design of sustainable buildings worldwide, over several climatic zones and eleven countries, together with clear explanations and illustrations of innovative design practice
- a discussion of common issues and the lessons that may be learnt from a study of the performance of sustainable buildings in practice, from the point of view of the people who use them.

This important book will be of great benefit to architects and engineers, facility managers of commercial and institutional buildings, as well as developers and researchers, academics and students in these fields.

From reader reviews:

Dorothy Wright:

The book Sustainable Buildings in Practice: What the Users Think can give more knowledge and information about everything you want. Why must we leave the great thing like a book Sustainable Buildings in Practice: What the Users Think? Some of you have a different opinion about publication. But one aim that book can give many info for us. It is absolutely correct. Right now, try to closer along with your book. Knowledge or details that you take for that, you are able to give for each other; it is possible to share all of these. Book Sustainable Buildings in Practice: What the Users Think has simple shape however you know: it has great and big function for you. You can search the enormous world by open up and read a reserve. So it is very wonderful.

Mable Garza:

As people who live in the actual modest era should be change about what going on or facts even knowledge to make these people keep up with the era that is certainly always change and make progress. Some of you maybe will update themselves by examining books. It is a good choice in your case but the problems coming to anyone is you don't know what one you should start with. This Sustainable Buildings in Practice: What the Users Think is our recommendation so you keep up with the world. Why, because book serves what you want and need in this era.

Deloras Pinkston:

Typically the book Sustainable Buildings in Practice: What the Users Think has a lot of knowledge on it. So when you read this book you can get a lot of benefit. The book was compiled by the very famous author. The writer makes some research prior to write this book. This book very easy to read you may get the point easily after looking over this book.

Michael Ogden:

As a college student exactly feel bored to be able to reading. If their teacher requested them to go to the library or to make summary for some guide, they are complained. Just very little students that has reading's soul or real their interest. They just do what the professor want, like asked to go to the library. They go to generally there but nothing reading very seriously. Any students feel that reading is not important, boring along with can't see colorful photos on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this era, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. So , this Sustainable Buildings in Practice: What the Users Think can make you really feel more interested to read.
