## Chapter 007, Assessment of Existing Structures and Repairs Mohamed El-Reedy

NOTE: This is a single chapter excerpted from the book *Offshore Structures*, made available for individual purchase. Additional chapters, as well as the entire book, may be purchased separately.

With most of the easy gas and oil reserves discovered and prices rebounding, companies are now drilling far offshore in extreme weather condition environments. As deepwater wells are drilled to greater depths, engineers and designers are confronted with new problems such as water depth, weather conditions, ocean currents, equipment reliability, and well accessibility. *Offshore Structure Design, Construction and Maintenance* covers all types of offshore structures and platforms employed worldwide.

The ultimate reference for selecting, operating and maintaining offshore structures, this book provides a road map for designing structures which will stand up even in the harshest environments. The selection of the proper type of offshore structure is discussed from a technical and economic point of view. The design procedure for the fixed offshore structure will be presented and how to review the design to reach the optimum solution. Nonlinear analysis (Push over) analysis will be presented as a new technique to design and assess the existing structure. Pile design and tubular joint with the effect of fatigue loading will be presented also from a theoretical and a practical point of view.

With this book in hand, engineers receive the most up-to-date methods for performing a structural life cycle analysis; implement maintenance plans for topsides and jackets, using non destructive testing. Under water inspection is discussed for hundreds of platforms in detail. Advanced repair methodology for scour, marine growth and damaged or deteriorating members are discussed. Risk based under water inspection techniques are covered from a practical point of view. In addition, the book will be supported by an online modeling and simulation program which will allow designers to save time and money by verifying assumptions online.

- One stop guide to offshore structure design and analysis
- Easy to understand methods for structural life cycle analysis
- Expert advice for designing offshore platforms for all types of environments
- Save time and money by verifying designs online

### **From reader reviews:**

#### **Benny Joiner:**

This Chapter 007, Assessment of Existing Structures and Repairs book is absolutely not ordinary book, you have after that it the world is in your hands. The benefit you receive by reading this book is actually information inside this guide incredible fresh, you will get info which is getting deeper anyone read a lot of information you will get. This particular Chapter 007, Assessment of Existing Structures and Repairs without we recognize teach the one who examining it become critical in considering and analyzing. Don't end up being worry Chapter 007, Assessment of Existing Structures and Repairs can bring whenever you are and not make your tote space or bookshelves' turn into full because you can have it within your lovely laptop even phone. This Chapter 007, Assessment of Existing Structures and Repairs having good arrangement in word and also layout, so you will not sense uninterested in reading.

#### **Marvin Murphy:**

Spent a free the perfect time to be fun activity to try and do! A lot of people spent their sparetime with their family, or their friends. Usually they performing activity like watching television, likely to beach, or picnic within the park. They actually doing same every week. Do you feel it? Will you something different to fill your own personal free time/ holiday? Could possibly be reading a book could be option to fill your totally free time/ holiday. The first thing you will ask may be what kinds of e-book that you should read. If you want to attempt look for book, may be the guide untitled Chapter 007, Assessment of Existing Structures and Repairs can be good book to read. May be it might be best activity to you.

#### **Gail Delamora:**

Reading a book to get new life style in this calendar year; every people loves to learn a book. When you read a book you can get a lots of benefit. When you read guides, you can improve your knowledge, due to the fact book has a lot of information upon it. The information that you will get depend on what kinds of book that you have read. If you want to get information about your research, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, such us novel, comics, and also soon. The Chapter 007, Assessment of Existing Structures and Repairs provide you with new experience in studying a book.

#### **Tamara Reams:**

That publication can make you to feel relax. This specific book Chapter 007, Assessment of Existing Structures and Repairs was vibrant and of course has pictures on the website. As we know that book Chapter 007, Assessment of Existing Structures and Repairs has many kinds or variety. Start from kids until young adults. For example Naruto or Private eye Conan you can read and think that you are the character on there. So , not at all of book are generally make you bored, any it can make you feel happy, fun and loosen up. Try to choose the best book in your case and try to like reading in which.
