Optimization Based Data Mining: Theory and Applications (Advanced Information and Knowledge Processing) Yong Shi, Yingjie Tian, Gang Kou, Yi Peng, Jianping Li

Optimization techniques have been widely adopted to implement various data mining algorithms. In addition to well-known Support Vector Machines (SVMs) (which are based on quadratic programming), different versions of Multiple Criteria Programming (MCP) have been extensively used in data separations. Since optimization based data mining methods differ from statistics, decision tree induction, and neural networks, their theoretical inspiration has attracted many researchers who are interested in algorithm development of data mining.

Optimization based Data Mining: Theory and Applications, mainly focuses on MCP and SVM especially their recent theoretical progress and real-life applications in various fields. These include finance, web services, bio-informatics and petroleum engineering, which has triggered the interest of practitioners who look for new methods to improve the results of data mining for knowledge discovery.

Most of the material in this book is directly from the research and application activities that the authors' research group has conducted over the last ten years. Aimed at practitioners and graduates who have a fundamental knowledge in data mining, it demonstrates the basic concepts and foundations on how to use optimization techniques to deal with data mining problems.

From reader reviews:

Caroline Petrie:

What do you with regards to book? It is not important along with you? Or just adding material if you want something to explain what the ones you have problem? How about your extra time? Or are you busy man? If you don't have spare time to accomplish others business, it is make you feel bored faster. And you have spare time? What did you do? Every person has many questions above. They should answer that question since just their can do that. It said that about e-book. Book is familiar on every person. Yes, it is suitable. Because start from on kindergarten until university need this particular Optimization Based Data Mining: Theory and Applications (Advanced Information and Knowledge Processing) to read.

Fern Rodriguez:

In this 21st millennium, people become competitive in each and every way. By being competitive currently, people have do something to make these individuals survives, being in the middle of the particular crowded place and notice through surrounding. One thing that at times many people have underestimated the idea for a while is reading. Yes, by reading a reserve your ability to survive raise then having chance to endure than other is high. For you who want to start reading the book, we give you this particular Optimization Based Data Mining: Theory and Applications (Advanced Information and Knowledge Processing) book as beginner and daily reading reserve. Why, because this book is greater than just a book.

Billie Gallagher:

Now a day folks who Living in the era exactly where everything reachable by match the internet and the resources included can be true or not demand people to be aware of each data they get. How individuals to be smart in acquiring any information nowadays? Of course the answer then is reading a book. Reading through a book can help folks out of this uncertainty Information specifically this Optimization Based Data Mining: Theory and Applications (Advanced Information and Knowledge Processing) book since this book offers you rich information and knowledge. Of course the knowledge in this book hundred % guarantees there is no doubt in it everybody knows.

Sean Jones:

E-book is one of source of knowledge. We can add our understanding from it. Not only for students but additionally native or citizen want book to know the change information of year for you to year. As we know those publications have many advantages. Beside we all add our knowledge, could also bring us to around the world. By book Optimization Based Data Mining: Theory and Applications (Advanced Information and Knowledge Processing) we can take more advantage. Don't you to be creative people? To become creative person must prefer to read a book. Just simply choose the best book that suitable with your aim. Don't always be doubt to change your life with that book Optimization Based Data Mining: Theory and Applications

(Advanced Information and Knowledge Processing). You can more inviting than now.
