## **Eta Products and Theta Series Identities (Springer Monographs in Mathematics)** Günter Köhler

This monograph deals with products of Dedekind's eta function, with Hecke theta series on quadratic number fields, and with Eisenstein series. The author brings to the public the large number of identities that have been discovered over the past 20 years, the majority of which have not been published elsewhere. The book will be of interest to graduate students and scholars in the field of number theory and, in particular, modular forms. It is not an introductory text in this field. Nevertheless, some theoretical background material is presented that is important for understanding the examples in Part II of the book. In Part I relevant definitions and essential theorems -- such as a complete proof of the structure theorems for coprime residue class groups in quadratic number fields that are not easily accessible in the literature -- are provided. Another example is a thorough description of an algorithm for listing all eta products of given weight and level, together with proofs of some results on the bijection between these eta products and lattice simplices.

### **From reader reviews:**

#### **Sandra Hughes:**

The ability that you get from Eta Products and Theta Series Identities (Springer Monographs in Mathematics) is a more deep you searching the information that hide in the words the more you get serious about reading it. It doesn't mean that this book is hard to understand but Eta Products and Theta Series Identities (Springer Monographs in Mathematics) giving you excitement feeling of reading. The article writer conveys their point in a number of way that can be understood through anyone who read it because the author of this book is well-known enough. This kind of book also makes your personal vocabulary increase well. It is therefore easy to understand then can go together with you, both in printed or e-book style are available. We advise you for having that Eta Products and Theta Series Identities (Springer Monographs in Mathematics) instantly.

#### **Matthew Hansen:**

Do you have something that you like such as book? The publication lovers usually prefer to choose book like comic, quick story and the biggest you are novel. Now, why not striving Eta Products and Theta Series Identities (Springer Monographs in Mathematics) that give your satisfaction preference will be satisfied simply by reading this book. Reading habit all over the world can be said as the way for people to know world considerably better then how they react toward the world. It can't be stated constantly that reading practice only for the geeky particular person but for all of you who wants to possibly be success person. So , for all you who want to start studying as your good habit, you could pick Eta Products and Theta Series Identities (Springer Monographs in Mathematics) become your own personal starter.

#### **June Slater:**

Are you kind of occupied person, only have 10 or perhaps 15 minute in your time to upgrading your mind expertise or thinking skill perhaps analytical thinking? Then you are receiving problem with the book when compared with can satisfy your short time to read it because pretty much everything time you only find e-book that need more time to be study. Eta Products and Theta Series Identities (Springer Monographs in Mathematics) can be your answer mainly because it can be read by you who have those short spare time problems.

#### **Marilynn Johnson:**

Guide is one of source of knowledge. We can add our expertise from it. Not only for students but also native or citizen require book to know the upgrade information of year to help year. As we know those textbooks have many advantages. Beside we all add our knowledge, can also bring us to around the world. From the book Eta Products and Theta Series Identities (Springer Monographs in Mathematics) we can get more advantage. Don't someone to be creative people? To get creative person must choose to read a book. Merely choose the best book that acceptable with your aim. Don't always be doubt to change your life at this book

Eta Products and Theta Series Identities (Springer Monographs in Mathematics). You can more attractive than now.
