Delivery Technologies for Biopharmaceuticals: Peptides, Proteins, Nucleic Acids and Vaccines

Delivery Technologies for Biopharmaceuticals: Peptides, Proteins, Nucleic Acids and Vaccines

Advances in biotechnology have provided scientists with an increasing number of biopharmaceuticals such as novel peptide and protein drugs as well as nucleic acid based drugs for gene therapy. However, successful delivery of these biopharmaceuticals is a major challenge because their molecular properties lead to poor physical and chemical stability in the body and limited membrane permeability. Therefore researchers are developing a range of new delivery technologies and materials to enable these new drugs to be delivered intact to their target sites.

Delivery Technologies for Biopharmaceuticals describes strategies to overcome the main barriers for successful delivery of therapeutic peptides, proteins, and nucleic acid-based drugs or vaccines related to the site of administration and the target site. Many of the approaches described are reported in formulations in current clinical trials as well as in marketed products. Contents include:

- challenges in delivery of biopharmaceuticals
- novel formulation approaches for peptide and protein injectables
- non-viral chemical vectors and viral technology for delivery of nucleic acid based drugs
- immune response, adjuvants and delivery systems for vaccines
- several examples of delivery systems for different biopharmaceuticals
- a critical assessment of delivery technologies for biopharmaceuticals

Delivery Technologies for Biopharmaceuticals is an essential single-volume introduction to the technologies used by researchers to ensure efficient delivery of this exciting new class of drugs. It will be of value to researchers and students working in drug delivery, formulation, biopharmaceuticals, medicinal chemistry, and new materials development.

From reader reviews:

Christopher Hairston:

Do you one among people who can't read enjoyable if the sentence chained inside the straightway, hold on guys that aren't like that. This Delivery Technologies for Biopharmaceuticals: Peptides, Proteins, Nucleic Acids and Vaccines book is readable by means of you who hate the straight word style. You will find the info here are arrange for enjoyable examining experience without leaving even decrease the knowledge that want to supply to you. The writer of Delivery Technologies for Biopharmaceuticals: Peptides, Proteins, Nucleic Acids and Vaccines content conveys prospect easily to understand by many individuals. The printed and e-book are not different in the written content but it just different by means of it. So , do you still thinking Delivery Technologies for Biopharmaceuticals: Peptides, Proteins, Nucleic Acids and Vaccines is not loveable to be your top checklist reading book?

Robin Harvey:

Is it you actually who having spare time subsequently spend it whole day by means of watching television programs or just resting on the bed? Do you need something new? This Delivery Technologies for Biopharmaceuticals: Peptides, Proteins, Nucleic Acids and Vaccines can be the answer, oh how comes? It's a book you know. You are therefore out of date, spending your extra time by reading in this fresh era is common not a geek activity. So what these textbooks have than the others?

Charles Aranda:

That reserve can make you to feel relax. This kind of book Delivery Technologies for Biopharmaceuticals: Peptides, Proteins, Nucleic Acids and Vaccines was colourful and of course has pictures on the website. As we know that book Delivery Technologies for Biopharmaceuticals: Peptides, Proteins, Nucleic Acids and Vaccines has many kinds or style. Start from kids until youngsters. For example Naruto or Detective Conan you can read and believe you are the character on there. Therefore , not at all of book are make you bored, any it offers up you feel happy, fun and loosen up. Try to choose the best book for yourself and try to like reading that will.

Gale Coachman:

E-book is one of source of understanding. We can add our information from it. Not only for students and also native or citizen want book to know the revise information of year to be able to year. As we know those ebooks have many advantages. Beside we add our knowledge, may also bring us to around the world. From the book Delivery Technologies for Biopharmaceuticals: Peptides, Proteins, Nucleic Acids and Vaccines we can take more advantage. Don't one to be creative people? To get creative person must choose to read a book. Just simply choose the best book that suited with your aim. Don't end up being doubt to change your life at this time book Delivery Technologies for Biopharmaceuticals: Peptides, Proteins, Nucleic Acids and Vaccines. You can more desirable than now.
