Robbers of the Mind Joan Wrenn

ROBBERS OF THE MIND is a book that concerns a large part of our population. As our Baby Boomers enter middle age and older, they are faced with problems that did not bother their parents-caring for parents who are living much longer and dealing with health problems that typically occur as they age. Boomers, who are retired and ready to travel and enjoy life, are faced with their parent's health problems. The question arises: "How can we enjoy retirement if our parents are ill"? When a parent is diagnosed with a long lasting fatal disease, the family needs to come together to make decisions about the care of their loved one. One of the most common diseases that plague older adults is Dementia. This book will help families become familiar with the many faces of Dementia and prepare them for the alternatives available for the best care possible.
