Secure Broadcast Communication: In Wired and Wireless Networks Adrian Perrig, J.D. Tygar

Secure Broadcast Communication in Wired and Wireless Networks presents a set of fundamental protocols for building secure information distribution systems. Applications include wireless broadcast, IP multicast, sensor networks and webs, ad hoc networks, and satellite broadcast. This book presents and compares new techniques for basic operations including:

- *key distribution for access control,
- *source authentication of transmissions, and
- *non-repudiation of streams.

This book discusses how to realize these operations both with high performance processors and resource constrained processors. It shows how to protect against adversaries who inject packets or eavesdrop. The focus is on functional descriptions rather than theoretical discussions. Protocols are presented as basic building blocks that can be combined with each other and traditional security protocols. The book illustrates these protocols in practice by presenting a real implementation that provides security for an ad hoc sensor network.

This book can serve as a textbook or supplementary reading in graduate level courses on security or networking, or can be used for self study.

From reader reviews:

Roger Cooper:

Hey guys, do you want to find a new book to study? Maybe the book with the headline Secure Broadcast Communication: In Wired and Wireless Networks suitable to you? The book was written by famous writer in this era. The actual book entitled Secure Broadcast Communication: In Wired and Wireless Networks is a single of several books that everyone read now. This book was inspired a number of people in the world. When you read this e-book you will enter the new dimensions that you ever know previous to. The author explained their plan in the simple way, consequently all of people can easily to be aware of the core of this e-book. This book will give you a large amount of information about this world now. In order to see the represented of the world on this book.

Nathan Lawhorn:

Are you kind of busy person, only have 10 or even 15 minute in your day to upgrading your mind talent or thinking skill perhaps analytical thinking? Then you are receiving problem with the book when compared with can satisfy your short space of time to read it because this time you only find reserve that need more time to be study. Secure Broadcast Communication: In Wired and Wireless Networks can be your answer as it can be read by you actually who have those short time problems.

Nicole Dilbeck:

In this era which is the greater man or who has ability to do something more are more valuable than other. Do you want to become certainly one of it? It is just simple strategy to have that. What you need to do is just spending your time almost no but quite enough to get a look at some books. Among the books in the top listing in your reading list is actually Secure Broadcast Communication: In Wired and Wireless Networks. This book that is qualified as The Hungry Slopes can get you closer in turning into precious person. By looking way up and review this reserve you can get many advantages.

Thelma Atkins:

Many people said that they feel fed up when they reading a e-book. They are directly felt the item when they get a half portions of the book. You can choose the actual book Secure Broadcast Communication: In Wired and Wireless Networks to make your current reading is interesting. Your skill of reading proficiency is developing when you just like reading. Try to choose straightforward book to make you enjoy to read it and mingle the idea about book and examining especially. It is to be first opinion for you to like to open up a book and examine it. Beside that the e-book Secure Broadcast Communication: In Wired and Wireless Networks can to be your friend when you're sense alone and confuse in what must you're doing of that time.
