Biomaterials and Medical Device - Associated Infections (Woodhead Publishing Series in Biomaterials)

Biomaterials and Medical Device - Associated Infections (Woodhead Publishing Series in Biomaterials)

Despite advances in materials and sterilisation, patients who receive biomaterials of medical device implants are still at risk of developing an infection around the implantation site. This book reviews the fundamentals of biomaterials and medical device related infections and methods and materials for the treatment and prevention of infection. The first part of the book provides readers with an introduction to the topic including analyses of biofilms, diagnosis and treatment of infection, pathology and topography. The second part of the book discusses a range of established and novel technologies and materials which have been designed to prevent infection.

- Provides analysis of biofilms and their relevance to implant associated infections.
- Assesses technologies for controlling biofilms.
- Considers advantages and disadvantages of in vivo infection studies.
