Materials Data for Cyclic Loading: High-Alloy Steels Chr. Boller, T. Seeger

Materials Data for Cyclic Loading, Part C: High-Alloy Steels provides the necessary data for a proper material assessment. The book presents the data of high-alloy steels that help estimate the crack initiation lives of structural parts.

The data sheets included in the text provide the description of the material and testing procedures, along with diagrams for stress-strain curves for monotonic and cyclic loading strain life curve. The book also provides the results of stress- and strain-controlled constant amplitude tests.

The text will be useful to researchers and practitioners of engineering, metallurgy, and physics.
