## **Information Science** David G. Luenberger

From cell phones to Web portals, advances in information and communications technology have thrust society into an information age that is far-reaching, fast-moving, increasingly complex, and yet essential to modern life. Now, renowned scholar and author David Luenberger has produced *Information Science*, a text that distills and explains the most important concepts and insights at the core of this ongoing revolution. The book represents the material used in a widely acclaimed course offered at Stanford University.

Drawing concepts from each of the constituent subfields that collectively comprise information science, Luenberger builds his book around the five "E's" of information: Entropy, Economics, Encryption, Extraction, and Emission. Each area directly impacts modern information products, services, and technology--everything from word processors to digital cash, database systems to decision making, marketing strategy to spread spectrum communication.

To study these principles is to learn how English text, music, and pictures can be compressed, how it is possible to construct a digital signature that cannot simply be copied, how beautiful photographs can be sent from distant planets with a tiny battery, how communication networks expand, and how producers of information products can make a profit under difficult market conditions.

The book contains vivid examples, illustrations, exercises, and points of historic interest, all of which bring to life the analytic methods presented:

- Presents a unified approach to the field of information science
- Emphasizes basic principles
- Includes a wide range of examples and applications
- Helps students develop important new skills
- Suggests exercises with solutions in an instructor's manual

### From reader reviews:

#### Jennifer Carter:

Nowadays reading books be than want or need but also turn into a life style. This reading routine give you lot of advantages. The advantages you got of course the knowledge the particular information inside the book in which improve your knowledge and information. The knowledge you get based on what kind of publication you read, if you want attract knowledge just go with schooling books but if you want truly feel happy read one having theme for entertaining like comic or novel. The particular Information Science is kind of e-book which is giving the reader capricious experience.

#### Teresa Ealy:

Do you really one of the book lovers? If so, do you ever feeling doubt when you are in the book store? Aim to pick one book that you never know the inside because don't determine book by its protect may doesn't work this is difficult job because you are frightened that the inside maybe not seeing that fantastic as in the outside seem likes. Maybe you answer might be Information Science why because the excellent cover that make you consider about the content will not disappoint you actually. The inside or content is usually fantastic as the outside as well as cover. Your reading 6th sense will directly make suggestions to pick up this book.

#### Christopher Hardnett:

In this particular era which is the greater particular person or who has ability in doing something more are more treasured than other. Do you want to become one among it? It is just simple approach to have that. What you are related is just spending your time little but quite enough to possess a look at some books. On the list of books in the top listing in your reading list is actually Information Science. This book and that is qualified as The Hungry Slopes can get you closer in growing to be precious person. By looking right up and review this book you can get many advantages.

#### Harry Barnes:

As a college student exactly feel bored to reading. If their teacher expected them to go to the library or to make summary for some reserve, they are complained. Just little students that has reading's soul or real their hobby. They just do what the trainer want, like asked to the library. They go to at this time there but nothing reading seriously. Any students feel that looking at is not important, boring and also can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore , this Information Science can make you experience more interested to read.
