Emerging Workforce Trends in the U.S. Energy and Mining Industries: A Call to Action Committee on Earth Resources, Board on Earth Sciences and Resources, Division on Earth and Life Studies, Board on Higher Education and Workforce, Policy and Global Affairs, National Research Council

Energy and mineral resources are essential for the nation's fundamental functions, its economy, and security. Nonfuel minerals are essential for the existence and operations of products that are used by people every day and are provided by various sectors of the mining industry. Energy in the United States is provided from a variety of resources including fossil fuels, and renewable and nuclear energy, all with established commercial industry bases. The United States is the largest electric power producer in the world. The overall value added to the U.S. gross domestic product (GDP) in 2011 by major industries that consumed processed nonfuel mineral materials was \$2.2 trillion.

Recognizing the importance of understanding the state of the energy and mining workforce in the United States to assure a trained and skilled workforce of sufficient size for the future, the Department of Energy's (DOE's) National Energy technology Laboratory (NETL) contracted with the National Research Council (NRC) to perform a study of the emerging workforce trends in the U.S. energy and mining industries. *Emerging Workforce Trends in the U.S. Energy and Mining Industries: A Call to Action* summarizes the findings of this study.

From reader reviews:

Jeffrey Dominguez:

Do you have favorite book? When you have, what is your favorite's book? E-book is very important thing for us to be aware of everything in the world. Each guide has different aim as well as goal; it means that reserve has different type. Some people really feel enjoy to spend their time and energy to read a book. They may be reading whatever they take because their hobby is definitely reading a book. Why not the person who don't like looking at a book? Sometime, man or woman feel need book once they found difficult problem as well as exercise. Well, probably you will require this Emerging Workforce Trends in the U.S. Energy and Mining Industries: A Call to Action.

Christine Andrews:

The book Emerging Workforce Trends in the U.S. Energy and Mining Industries: A Call to Action can give more knowledge and information about everything you want. Exactly why must we leave a very important thing like a book Emerging Workforce Trends in the U.S. Energy and Mining Industries: A Call to Action? Several of you have a different opinion about reserve. But one aim that book can give many information for us. It is absolutely proper. Right now, try to closer together with your book. Knowledge or details that you take for that, you could give for each other; you may share all of these. Book Emerging Workforce Trends in the U.S. Energy and Mining Industries: A Call to Action has simple shape but you know: it has great and big function for you. You can appear the enormous world by wide open and read a reserve. So it is very wonderful.

Donald Murray:

Often the book Emerging Workforce Trends in the U.S. Energy and Mining Industries: A Call to Action has a lot info on it. So when you read this book you can get a lot of help. The book was authored by the very famous author. The author makes some research previous to write this book. This book very easy to read you can find the point easily after reading this book.

William Black:

Is it you who having spare time subsequently spend it whole day by means of watching television programs or just lying on the bed? Do you need something new? This Emerging Workforce Trends in the U.S. Energy and Mining Industries: A Call to Action can be the response, oh how comes? The new book you know. You are so out of date, spending your free time by reading in this brand-new era is common not a nerd activity. So what these textbooks have than the others?
