Drugs, Clubs and Young People: Sociological and Public Health Perspectives

Drugs, Clubs and Young People: Sociological and Public Health Perspectives

In this volume, contributors employ sociological and public health perspectives to offer insights into behaviours common at raves and nightclubs. The volume provides theoretical observations on illicit club drug use and supply, helping to challenge current orthodoxies on the role of drug use within young peoples' lives. Drawing material from the USA, UK and Hong Kong, the volume allows the demystification of stereotypical presentations surrounding young people who attend clubs and/or use club drugs. This work provides a badly needed and objective analysis of youthful drug use, and a foundation from which future sociological and public studies on young people, clubs and drugs – as well as young people themselves – will benefit.
