Decision-Making for Supply Chain Integration: Supply Chain Integration: 1 (Decision Engineering)

Decision-Making for Supply Chain Integration: Supply Chain Integration: 1 (Decision Engineering)

Effective supply chain integration, and the tight co-ordination it creates, is an essential pre-requisite for successful supply chain management. *Decision-Making for Supply Chain Integration* is a practical reference on recent research in the area of supply chain integration focusing on distributed decision-making problems. Recent applications of various decision-making tools for integrating supply chains are covered including chapters focusing on:

Supplier selection, pricing strategy and inventory decisions in multi-level supply chains,
RFID-enabled distributed decision-making,
Operational risk issues and time-critical decision-making for sensitive logistics nodes, Modelling end to end processes to improve supply chain integration, and
Integrated systems to improve service delivery and optimize resource use.

Decision-Making for Supply Chain Integration provides an insight into the tools and methodologies of this field with support from real-life case studies demonstrating successful application of various decision-making techniques. By covering such a range of topics in this way, *Decision-Making for Supply Chain Integration* is a useful reference for researchers looking to develop their knowledge or find potential new avenues of research.
