**Social Network Analysis with Applications** Ian McCulloh, Helen Armstrong, Anthony Johnson  
**A comprehensive introduction to social network analysis that hones in on basic centrality measures, social links, subgroup analysis, data sources, and more**

Written by military, industry, and business professionals, this book introduces readers to social network analysis, the new and emerging topic that has recently become of significant use for industry, management, law enforcement, and military practitioners for identifying both vulnerabilities and opportunities in collaborative networked organizations.

Focusing on models and methods for the analysis of organizational risk, *Social Network Analysis with Applications* provides easily accessible, yet comprehensive coverage of network basics, centrality measures, social link theory, subgroup analysis, relational algebra, data sources, and more. Examples of mathematical calculations and formulas for social network measures are also included.

Along with practice problems and exercises, this easily accessible book covers:

- The basic concepts of networks, nodes, links, adjacency matrices, and graphs
- Mathematical calculations and exercises for centrality, the basic measures of degree, betweenness, closeness, and eigenvector centralities
- Graph-level measures, with a special focus on both the visual and numerical analysis of networks
- Matrix algebra, outlining basic concepts such as matrix addition, subtraction, multiplication, and transpose and inverse calculations in linear algebra that are useful for developing networks from relational data
- Meta-networks and relational algebra, social links, diffusion through networks, subgroup analysis, and more

An excellent resource for practitioners in industry, management, law enforcement, and military intelligence who wish to learn and apply social network analysis to their respective fields, *Social Network Analysis with Applications* is also an ideal text for upper-level undergraduate and graduate level courses and workshops on the subject.

### **From reader reviews:**

#### **Pam Boyd:**

Here thing why this Social Network Analysis with Applications are different and reliable to be yours. First of all reading a book is good but it really depends in the content from it which is the content is as scrumptious as food or not. Social Network Analysis with Applications giving you information deeper including different ways, you can find any reserve out there but there is no e-book that similar with Social Network Analysis with Applications. It gives you thrill studying journey, its open up your own eyes about the thing this happened in the world which is maybe can be happened around you. It is easy to bring everywhere like in park, café, or even in your approach home by train. In case you are having difficulties in bringing the branded book maybe the form of Social Network Analysis with Applications in e-book can be your substitute.

#### **Miguel Penix:**

The actual book Social Network Analysis with Applications has a lot associated with on it. So when you make sure to read this book you can get a lot of help. The book was written by the very famous author. Tom makes some research previous to write this book. That book very easy to read you will get the point easily after perusing this book.

#### **Kelly Mays:**

You will get this Social Network Analysis with Applications by check out the bookstore or Mall. Merely viewing or reviewing it can to be your solve challenge if you get difficulties to your knowledge. Kinds of this reserve are various. Not only by means of written or printed but also can you enjoy this book by e-book. In the modern era including now, you just looking of your mobile phone and searching what their problem. Right now, choose your own personal ways to get more information about your e-book. It is most important to arrange you to ultimately make your knowledge are still update. Let's try to choose suitable ways for you.

#### **Gary Carter:**

Reading a reserve make you to get more knowledge from this. You can take knowledge and information from your book. Book is composed or printed or descriptive from each source which filled update of news. On this modern era like now, many ways to get information are available for a person. From media social like newspaper, magazines, science book, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Ready to spend your spare time to open your book? Or just searching for the Social Network Analysis with Applications when you desired it?
