**British Generals in Blair's Wars (Military Strategy and Operational Art)** Jonathan Bailey, Richard Iron, Hew Strachan

This is a truly unique and invaluable book. For the first time, we are offered first-hand testimony about Britain's involvement in recent campaigns by senior participants. In addition to touching on themes like civilian-military relations, the operational direction of war and relationships with allies, these eyewitness accounts give a real sense of how the character of a war changes even as it is being fought. It will be essential reading for those in military academies and staff colleges, not only in Britain but throughout NATO, and especially in the USA. It also has profound policy implications, as both the UK and NATO more generally reassess their strategies and the value of intervention operations. It will also become a primary source for historians and students of the wars, in Iraq and Afghanistan in particular.
