Materials in Construction: An Introduction

G. D. Taylor

Materials in Construction: An Introduction G. D. Taylor

Materials in Construction: An Introduction presents a clear and accessible introduction to the principles, practice and performance of construction materials. This new edition is being published as a companion to G. D. Taylor's *Materials in Construction: Principles, Practice and Performance* - an advanced text that will develop the topics presented in this book. The coverage of a wide range of construction materials provides a comprehensive foundation to the subject, and includes an overview of performance characteristics and standards for many materials. The text also reviews material properties, and examines and evaluates modes of deterioration while emphasising preventative techniques and remedial treatment. Throughout the text carefully devised example experiments and questions support the theory and practical information. *Materials in Construction* is an essential handbook for any student studying materials as part of a construction course at BTEC NC/D, HNC/D and undergraduate level.
