Assessment and Prediction of Speech Quality in Telecommunications Sebastian Möller

The quality of a telecommunication voice service is largely influenced by the quality of the transmission system. Nevertheless, the analysis, synthesis and prediction of quality should take into account its multidimensional aspects. Quality can be regarded as a point where the perceived characteristics and the desired or expected ones meet. A schematic is presented which classifies different entities which contribute to the quality of a service, taking into account conversational, user as well as service related contributions. Starting from this concept, perceptively relevant constituents of speech communication quality are identified. The perceptive factors result from elements of the transmission configuration. A simulation model is developed and implemented which allows the most relevant parameters of traditional transmission configurations to be manipulated, in real time and for the conversation situation. Inputs into the simulation are instrumentally measurable quality elements commonly used in transmission planning of telephone networks. A reduced set of these quality elements forms a basis for models which aim at predicting mouth-to-ear quality as it would be perceived by a user of the system. These models are an important tool for the planner of telecommunication networks, as they allow the expected quality to be estimated in advance, even before the network has been set up. Two well-known models (the SUBMOD and the E-model) are analyzed in more detail, with an emphasis on the psychoacoustic and psychophysical backgrounds.

From reader reviews:

Sheldon Downs:

Have you spare time to get a day? What do you do when you have considerably more or little spare time? That's why, you can choose the suitable activity with regard to spend your time. Any person spent their own spare time to take a stroll, shopping, or went to the actual Mall. How about open or even read a book titled Assessment and Prediction of Speech Quality in Telecommunications? Maybe it is being best activity for you. You already know beside you can spend your time along with your favorite's book, you can more intelligent than before. Do you agree with their opinion or you have additional opinion?

Joseph Wood:

The book Assessment and Prediction of Speech Quality in Telecommunications can give more knowledge and also the precise product information about everything you want. So just why must we leave a good thing like a book Assessment and Prediction of Speech Quality in Telecommunications? Several of you have a different opinion about book. But one aim that will book can give many data for us. It is absolutely appropriate. Right now, try to closer with your book. Knowledge or info that you take for that, you could give for each other; you could share all of these. Book Assessment and Prediction of Speech Quality in Telecommunications has simple shape nevertheless, you know: it has great and large function for you. You can appear the enormous world by available and read a guide. So it is very wonderful.

Janie Williams:

Hey guys, do you wishes to finds a new book to study? May be the book with the concept Assessment and Prediction of Speech Quality in Telecommunications suitable to you? Often the book was written by popular writer in this era. The book untitled Assessment and Prediction of Speech Quality in Telecommunications is one of several books which everyone read now. This particular book was inspired many people in the world. When you read this book you will enter the new dimension that you ever know ahead of. The author explained their idea in the simple way, so all of people can easily to understand the core of this guide. This book will give you a lots of information about this world now. So you can see the represented of the world in this book.

Jaime McKenney:

You are able to spend your free time to see this book this book. This Assessment and Prediction of Speech Quality in Telecommunications is simple bringing you can read it in the area, in the beach, train and soon. If you did not include much space to bring often the printed book, you can buy the actual e-book. It is make you easier to read it. You can save typically the book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.
