The Price of Death: The Funeral Industry in Contemporary Japan Hikaru Suzuki

Funerary practices have long been a classic topic of anthropological inquiry, which has tended to focus on death rituals as expressions and reinforcers of community ties and values. In this book, the author looks at funerals as an urban business, based on her fieldwork at a large Japanese funeral company. Her central theme is the progressive commercialization of what once were primarily religious rituals. The book depicts the process of contemporary Japanese funerals, the practices of those who provide commercial funeral services, and the motivations and behavior of the mourners who purchase those services. In so doing, it examines the role of funeral companies in shaping Japanese cultural practices and changing an important aspect of Japanese society. The author addresses several related questions: What cultural changes accompanied the shift from traditional community funeral rituals to commercial funeral services? How did the mass consumption of commercial funerals produce cultural homogeneity while allowing for differences in individual services? How does the marketing of professional funeral services mediate changing cultural values? How have commercial services served to objectify changing concepts of dying, death, and the deceased in contemporary Japan?
