Unleashing the Potential of Renewable Energy in India (World Bank Studies) Sudeshna Ghosh Banerjee, Gevorg Sargsyan, Mikul Bhatia, Krishnan Raghunathan, Ruchi Soni

India has 150GW of renewable energy potential, about half in the form of small hydropower, biomass, and wind and half in solar, cogeneration, and waste-to-energy. Developing renewable energy can help India increase its energy security, reduce the adverse impacts on the local environment, lower its carbon intensity, contribute to more balanced regional development, and realize its aspirations for leadership in high-technology industries. This study aims to answer critical questions on why renewable energy development is relevant in Indian context, on how much development is economically feasible, and on what needs to be done to realize the potential. The Report is based on data from nearly 180 wind, biomass, and small hydropower projects in 20 states, as well as information from the Ministry of New and Renewable Energy (MNRE) and the Central Electricity Regulatory Commission (CERC). The Report suggests that about 3GW of renewable energy – all from small hydropower is economically feasible, when the avoided cost of coal-based generation of Rs 3.08/kWh is considered. About 59GW of renewable energy in wind, biomass, and small hydropower is available at less than Rs 5/kWh. The entire cumulative capacity of 68GW in these three technologies can be harnessed at less than Rs 6/kWh. About 62GW—90 percent of cumulative renewable capacity in wind, biomass, and small hydropower—is economically feasible when the environmental premiums on coal are brought into consideration. Realizing the need to bridge this gap, the government has set an ambitious target of installing at least 40GW of additional capacity of renewables in the next 10 years. India has made tremendous strides in establishing overarching policy framework and institutions to bring renewable in the mainstream of energy mix, but significant financial, infrastructure and regulatory barriers to renewable energy development remain which the report sheds light on and suggests possible solutions.

From reader reviews:

Jake Leslie:

Have you spare time for the day? What do you do when you have much more or little spare time? Yes, you can choose the suitable activity regarding spend your time. Any person spent all their spare time to take a move, shopping, or went to typically the Mall. How about open or read a book titled Unleashing the Potential of Renewable Energy in India (World Bank Studies)? Maybe it is to get best activity for you. You understand beside you can spend your time along with your favorite's book, you can cleverer than before. Do you agree with their opinion or you have other opinion?

Tina West:

Are you kind of stressful person, only have 10 as well as 15 minute in your time to upgrading your mind expertise or thinking skill perhaps analytical thinking? Then you are experiencing problem with the book than can satisfy your limited time to read it because pretty much everything time you only find book that need more time to be read. Unleashing the Potential of Renewable Energy in India (World Bank Studies) can be your answer since it can be read by you actually who have those short time problems.

Harry Blalock:

You can spend your free time to study this book this book. This Unleashing the Potential of Renewable Energy in India (World Bank Studies) is simple bringing you can read it in the playground, in the beach, train and also soon. If you did not have much space to bring the actual printed book, you can buy typically the e-book. It is make you better to read it. You can save typically the book in your smart phone. Therefore there are a lot of benefits that you will get when one buys this book.

Virgil Santamaria:

As a university student exactly feel bored to be able to reading. If their teacher asked them to go to the library or even make summary for some book, they are complained. Just very little students that has reading's heart or real their hobby. They just do what the educator want, like asked to go to the library. They go to there but nothing reading really. Any students feel that reading through is not important, boring and also can't see colorful photos on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this period, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore , this Unleashing the Potential of Renewable Energy in India (World Bank Studies) can make you sense more interested to read.
