## Developing CDM Projects in the Western Balkans: Legal and Technical Issues Compared

Developing CDM Projects in the Western Balkans: Legal and Technical Issues Compared, arises from the professional practical experience gained by an interdisciplinary team of legal and technical experts acting in the framework of the environmental bilateral cooperation performed by the Italian Ministry for the Environment, Land and Sea in the Western Balkan countries, through the "Task Force for Central and Eastern Europe".

The added value of the book consists in the fact that it jointly presents the real professional experience gained by a multi sectoral team of lawyers, economists, engineers and other technical experts, working in synergy with a shared vision.

This volume will be useful not only to those specifically interested in the Western Balkan area, but represents a broader example of lessons learned in the development of CDM projects. Therefore, it may have a broad market among Government officials and legal-economic-technical professionals dealing with climate change issues as well as academics developing scientific research in this field.
