Exploratory Multivariate Analysis by Example Using R (Chapman & Hall/CRC Computer Science & Data Analysis) Francois Husson, Sebastien Le, Jerome Pages

Full of real-world case studies and practical advice, **Exploratory Multivariate Analysis by Example Using R** focuses on four fundamental methods of multivariate exploratory data analysis that are most suitable for applications. It covers principal component analysis (PCA) when variables are quantitative, correspondence analysis (CA) and multiple correspondence analysis (MCA) when variables are categorical, and hierarchical cluster analysis.

The authors take a geometric point of view that provides a unified vision for exploring multivariate data tables. Within this framework, they present the principles, indicators, and ways of representing and visualizing objects that are common to the exploratory methods. The authors show how to use categorical variables in a PCA context in which variables are quantitative, how to handle more than two categorical variables in a CA context in which there are originally two variables, and how to add quantitative variables in an MCA context in which variables are categorical. They also illustrate the methods and the ways they can be exploited using examples from various fields.

Throughout the text, each result correlates with an R command accessible in the FactoMineR package developed by the authors. All of the data sets and code are available at <http://factominer.free.fr/book>

By using the theory, examples, and software presented in this book, readers will be fully equipped to tackle real-life multivariate data.

From reader reviews:

Pearlie Henry:

Reading a guide can be one of a lot of pastime that everyone in the world enjoys. Do you like reading book consequently. There are a lot of reasons why people enjoyed. First reading a book will give you a lot of new facts. When you read a guide you will get new information due to the fact book is one of various ways to share the information or perhaps their idea. Second, looking at a book will make you more imaginative. When you reading a book especially fictional works book the author will bring one to imagine the story how the people do it anything. Third, you may share your knowledge to some others. When you read this Exploratory Multivariate Analysis by Example Using R (Chapman & Hall/CRC Computer Science & Data Analysis), you may tells your family, friends in addition to soon about yours e-book. Your knowledge can inspire others, make them reading a reserve.

Alexander Macdougall:

Exploratory Multivariate Analysis by Example Using R (Chapman & Hall/CRC Computer Science & Data Analysis) can be one of your nice books that are good idea. Many of us recommend that straight away because this publication has good vocabulary that may increase your knowledge in terminology, easy to understand, bit entertaining but nonetheless delivering the information. The author giving his/her effort to set every word into satisfaction arrangement in writing Exploratory Multivariate Analysis by Example Using R (Chapman & Hall/CRC Computer Science & Data Analysis) although doesn't forget the main level, giving the reader the hottest in addition to based confirm resource info that maybe you can be certainly one of it. This great information can easily drawn you into brand-new stage of crucial considering.

Jean Gaskin:

Many people spending their time by playing outside using friends, fun activity along with family or just watching TV the whole day. You can have new activity to shell out your whole day by reading through a book. Ugh, do you think reading a book can actually hard because you have to take the book everywhere? It all right you can have the e-book, taking everywhere you want in your Smartphone. Like Exploratory Multivariate Analysis by Example Using R (Chapman & Hall/CRC Computer Science & Data Analysis) which is finding the e-book version. So , why not try out this book? Let's view.

Randal Gore:

In this particular era which is the greater man or who has ability in doing something more are more important than other. Do you want to become one of it? It is just simple strategy to have that. What you should do is just spending your time very little but quite enough to get a look at some books. One of several books in the top collection in your reading list is actually Exploratory Multivariate Analysis by Example Using R (Chapman & Hall/CRC Computer Science & Data Analysis). This book that is certainly qualified as The Hungry Slopes can get you closer in becoming precious person. By looking upwards and review this e-book

you can get many advantages.
