This book contains essays presented at a conference held in November 2010 to mark the centenary of the famous 1910 Jekyll Island meeting of leading American financiers and the US Treasury. The 1910 meeting resulted in the Aldrich Plan, a precursor to the Federal Reserve Act that was enacted by Congress in 1913. The 2010 conference, sponsored by the Federal Reserve Bank of Atlanta and Rutgers University, featured assessments of the Fed's near 100-year track record by prominent economic historians and macroeconomists. The final chapter of the book records a panel discussion of Fed policy making by the current and former senior Federal Reserve officials.
